

⋮ This hard-working, lightweight puller sets up in only minutes, operates at both 25ft. and 100ft. per minute  
 ⋮ and will pull up to 4000 pounds. Best of all the Pull-It 3000 requires only one person to set up and operate.

### Maxis Pull-It 3000 Benefits

#### Faster

- ⋮ 2 minute set up time
- ⋮ 2 pulling speeds, 25ft/min & 100ft/min

#### Easier

- ⋮ Light-weight (60 lbs)
- ⋮ One-Person setup and operate
- ⋮ No need to bolt to the ground

#### Smarter

- ⋮ Quickly adapts from underground to overhead pulls
- ⋮ Versatile, will adapt to any pull

"Instead of hand pulling I used the Pull-It 3000 to pull in 3 #2 wires and a ground, 350 feet, in an 1 1/4 conduit. It took less than 6 minutes."

Jamie McGrath, CNM Electric

"I pulled 4 conductors of 500 MCM in 3 1/2 inch conduit, 200 feet, underground in 6 minutes."

Michael Maderazzo, Canyon State Electric Co.

"I pulled 22 light pole bases in 2 hours."

Lyn Tawzer, Irvine Electric

"We pulled a 385-foot run of five 350 MCM wires. It took us longer to set up the spools than it took to set up the puller and pull the wire in."

Tony Rayhel, D.A. Rayhel Electrical Contracting
